Office Action Summary	Application No. 09/936,390	Applicant(s) VAAGE, JOAR	
	Examiner Audrey Y. Chang	Art Unit 2872	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Remark

- This Office Action is in response to applicant's amendment filed on October 27, 2003, which has been entered.
- By this amendment, the applicant has amended claims 1-2.
- Claims 1-2 remain pending in this application.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. **Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over the patent issued to Izawa et al in view of the patent issued to Shikama et al.**

The reasons for rejection are set forth in the previous Office Action dated May 23, 2003.

Claim 1 has been amended to include the feature that the first projector and the second project are different from each other. Izawa et al teaches explicitly that two projection units (50R and 50L, Figure 20) that are different from each other can be used to project the images, (please see column 13 line 64 to column 14 line 6).

Response to Arguments

3. Applicant's arguments filed on October 27, 2003 have been fully considered but they are not persuasive.

Art Unit: 2872

4. In response to applicant's arguments which state that the cited Shikama reference teaches a device that is "complicated projecting apparatus", including light valve, light valve driving circuit, the polarizer and the scanning circuit which therefore cannot be combined with the device taught by the cited Izawa et al reference, the examiner respectfully disagrees for the reasons stated below. The applicant is respectfully reminded that the Shikama reference is *relied solely* upon the **demonstration of the well-known technique in the art** for alternatively *scanning* the image frame memories to provide left eye and right eye images in an *alternative manner*, (please see column 8, lines 8-18, and 28-42). The primary Izawa et al reference has *already taught* that **scanning** image signals (emphasis added on the word "scanning") may be stored in the frame memory, (26a and 26b, Figure 3), the secondary Shikama reference is **only** provided to give an **explicitly** teaching about using *scanning circuit* to repeatedly or cyclically scan the frame memory to provide left eye and right eye images alternatively, if such has not been implicitly taught in the Izawa et al reference. This scanning circuit means has nothing to do how "complicated" the device of Shikama reference is or is not.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2872

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
